Why join EASA as a full active member?  
Here are just a few GREAT benefits to being a member!

EASA is a specialist trade organization  
We are the largest international trade association in  
the world fully dedicated to Electromechanical  
Services (Motors and Rotating Machines Systems).  
We have over 1900 member companies, in more  
than 60 countries around the world and a dedicated  
office in Luxembourg.

Free engineering consulting service  
A team of 5 top industry experts is available to  
answer all technical questions and support your  
business - more than 20 000 emails answered  
per year.

Specialist EASA training programs  
We offer a wide variety of training specific to the  
electromechanical industry including seminars,  
webinars, interactive CDs and online training, on a  
variety of topics including how to wind a motor, root  
cause failure analysis and sales and marketing.

Technical resources  
EASA’s online Technical Manual is available for EASA  
members in a searchable, digital book format plus  
access to 440 reports and various manuals.

EASA has the widest variety of motor winding data  
available anywhere, with data on 260 000 motors  
including measures and drawings you are sure to  
find the information you need.

Tailored industry information and  
promotional materials  
Valuable market research and analysis reports, news  
articles and newsletters to share information between  
members and promote your company.

Industry representation  
EASA acts as the voice of the industry worldwide and  
across all sectors including IEC, IEEE, NEMA, Pulp &  
Paper and Oil & Gas. With more than 1 million reports  
written by EASA printed around the world, we deliver  
presentations and trade articles to highlight our  
members interests.

Regional and international networking  
opportunities  
Every year EASA organizes the largest  
electromechanical convention in the world,  
with 2500 participants and 220 exhibitors, where our  
members benefit from networking with colleagues  
from around the globe. Each chapter also organizes  
its own events where members learn from each other  
and develop best practice locally.

EASA Accreditation  
Demonstrates to industry, energy advocates and  
regulatory agencies that your firm is dedicated to  
repairs that maintain efficiency and reliability. EASA  
has developed an independent international  
accreditation program for service centers.

Members can access all of our resources online at  
easa.com.

If you want to go fast, go alone. 
If you want to go far, go together!

“Since 25 years we are an active member of EASA Region 9. Our internationalization into the Netherlands, Belgium and France would never have been successful without the friends and contacts we made in EASA, that helped us to enter these new markets. Many discussions about the experiences other EASA members had when going abroad, saved us making too many faults, when creating new business. I highly recommend an EASA membership to those electro mechanical repair shops that have to change their strategy and find new markets and products.”

Christian Vogelsang
General Manager, Vogelsang, Germany

“We have been members of EASA since 1990. In that time EASA has given us guidance/technical knowledge/ network of contacts/ access to equipment which has completely transformed our Company. We would simply not be the Company we are - without EASA.”

Derry Sheehan
Avonmore, Cork, Ireland

“Since 40 years we have been a member of EASA, which makes us the oldest member in Germany. For the world-wide sales of our motors, the EASA network becomes more important every day. The networking is the 2nd most important issue, and we have learnt so much through that network. I'm convinced that in times of growing internationalization and globalization we need strong networks and associations, more than ever before.”

Mathis Menzel
Managing Director, Menzel Elektromotoren, Germany

“One of the greatest Benefits of membership is access to EASA's outstanding technical support team and the resources they produce. I have attended numerous EASA seminars and Webinars and always learn something new from the instructors. Webinars provide very cost-effective training, and that's especially important to us. Our company has been a long-time EASA member; we appreciate the service and Benefits we've received over the years.”

Scott Madden
Scotty's Electric Motor Repair, Orland, California
